## What do we contribute?

- Training
- Digital transformation
- Migrate, debug and exploit data

# Content

# Training

## Project management

Preparation for PMP, PRINCE2, ITIL certifications ...  
Mentoring and coaching of teams to improve processes and performance.

## Digital transformation

Know the maturity of new technologies, capabilities of the organization and propose a technological roadmap that accompanies the business strategy of the company.

## Business analytics

Python, advanced Excel, RapidMiner and PowerBI course to get the most out of the organization's data and external sources.

# Digital transformation

- Business and technology consulting to create a technological vision roadmap aligned with business objectives.
- Digital transformation workshop.
- Constitute and support the team that will lead the transformation.
- Search of suppliers.
- Periodic monitoring of the execution, updating the roadmap and portfolio.

# Migrate, debug and exploit the data

- We analyze the current situation and make the necessary improvements to make the most of the data, generating quality, reliable information in real time.
- We accompany and implement migration and data purification projects.
- We generate mechanisms for transferring data, processes and integrations, with custom development, ETL or RPA tools.
- We configure and support the creation of reports and dashboards with the different market tools.
